

The lavender fields of Provence have provided inspiration to artists for centuries! Join me on this glamorous workshop tour and create your own souvenir masterpiece with colored pencils. Over the course of 3 workshop sessions (total of 9 hours), I'll show you how to create the vibrant purple lavender, the lustrous glass bottles, the smooth white wood with cut-outs, the grainy wood table, and the lovely background. Students will be provided with packets including the supply list, line drawing on the actual art paper (no drawing skills needed!), an illustrated step-by-step instructional booklet, class demo directions, and the photo reference. Learn how to transform a colored pencil drawing into a stunning painting with a variety of tips and techniques taught during this class. ALL SKILL LEVELS will feel comfortable, and we'll progress at a moderate pace. While we won't finish this project in Provence, you'll have a great head start for when you return home with fond memories of this amazing international experience. Artworks will be critiqued privately via email as often as desired by the student. The supply list will be emailed to participants by May 15, 2023.
